Full Stack Cloud Service Provider

Colocation offers capacity, power, safety, and security in our data centers without the headaches and costs of managing your own.

Expedient Enterprise Cloud is a fully managed VMware-based cloud that accelerates your transformation, offering a place to land legacy applications and derive value quicker.

Push Button Disaster Recovery allows organizations to failover seamlessly to an off-site location in the event of an outage.

Expedient Enterprise Workspace offers scalable, highly available virtual desktop infrastructure-as-a-service that enables your workforce to be productive and secure from anywhere.

National Reach, Local Expertise

Our interconnected network of data centers provides points of delivery in strategic locations throughout the United States for cloud, colocation, disaster recovery, and virtual desktop infrastructure (VDI) in world-class facilities with 24×7×365 on-site support.
